

T190-EJECUTAR Y USAR VIA TELNET ALGUN JUEGO O PROGRAMA DE LA LISTA

31/03/2019

The screenshot shows a Trello board titled "T190-EJECUTAR Y USAR VIA TELNET ALGUN JUEGO O PROGRAMA DE LA LISTA" in the "PRO-TAREAS" column. The board lists several tasks (PTE) related to telnet, including "T189-USANDO ALGUN METODO DE ALGUNA CLASE DE LA JFC FORZAR ALGUNA DE LAS SIGUIENTE EXCEPCIONES (ABRIRI)", "T187-[EXCEPCIONES] REALIZAR UN EJEMPLO PENSADO POR EL ALUMNO DONDE SE USE MULTICATCH", "T186-[EXCEPCIONES] PONER DOS EJEMPLOS DISTINTOS DE USO DE UNSUPPORTED EXCEPTION", and "T185-[EXCEPCIONES] BUSCAR EN EL CODIGO FUENTE DE LAS CLASES RELACIONADAS CON EXCEPCIONES EN LA API DE".

Overlaid on the Trello board is a terminal window titled "alonso@casa: ~". The terminal shows a telnet session to "abode". The user enters "type ?" and receives a list of companies and their locations. The user then enters "ping abode" and receives a response indicating a successful connection.

The terminal output is as follows:

```
alonso@casa: ~
